-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Behlmann et al. (4,978,023). Behlmann et al. disclose the limitations of the claims including a multi-layered container (figs. 1-6) comprising a cover (30), first locking projections (70), a plurality of container bodies (28), locking flaps (26, from a top surface, a portion extending radially inward) rotated between locked (locking flap portion) and unlocked (cut-out portion) positions, locking hole (26, recessed area made to receive first locking projections), intermediate lid (42), plate-shaped part (44), coupling part/slot (64), coupling flanges with second/third locking projections (62) being locked to the locking flaps of a neighboring container body (fig. 2), guide rail (26, sides of cut-out portion made to receive projection 70), packing (56), second locking projections (62, on a bottom portion of said container bodies), wherein second and third locking projections are locked to the same locking flap (fig. 2, third locking projection not shown but present, see col. 2, line 50). Note, second and third locking projections are locked to the same locking flap (26), present in two separate locations, the intermediate lid and a container body. It should also be noted that the bottom edge of the

intermediate lid (42) is the same as the bottom of container body (28), see col. 2, line 50.

Allowable Subject Matter

3. Claims 2, 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
